SMITH PUTS BLAME OF TIEUP ON PUBLIC

Indifference of Government to Railroads' Needs Also Is Attacked.

TALKS TO DRY GOODS MEN

Regional Director Gives Vivid Picture of Struggle to Relieve Congestion.

The Regional Director of Railroads, A. H. Smith, talked before the National Retail Dry Goods Association at the Hotel Astor yesterday and presented a vivid picture of the struggles and

public and Government to their connection with the whole fabric of every day life and business prosperity. He used a concrete illustration for another cause

of the present congestion.
"Suppose," he said, "a man was standing in a corner of your store and some-body came along and crowded five bundles into his arms and said: "I shall let you know to morrow what to do with them.' Your man stands there and holds the bundles. We have thousands of cars in just that position, and we don't know what to do with them be-cause somebody has shipped them by

"If you were in a switching yard, where I have been in my time, you would understand it is not hard to handle cars. That is our business. We are supposed to do it and we know how to do it. But the difficulty is you do not know what to do with the stuff in the cars after you get hold of it, because it is billed to John Doe, although neitification must go to Richard Roe.

"When you have to pick up 5,500 or 6,000 tons that way and throw it over again it is distressing. If you had to handle your business that way you would go broke. But that is exactly how you are making it so difficult for the railroads to do things. If you want to help don't load your stuff on the railroads and then find fault because they can't correct all of your mistakes."

The Regional Director presented a rend great of the govern the his system. About the present sturrery of railroad une and down. "If you were in a switching yard.

ter that came a period of depression, so that in 1913 there was \$500,000,000 of rusted equipment standing on the side tracks in this country. Then we came along to the latter part of 1915, when the war was on, and that speeded up our productiveness and the railroads began to use again all that they had. In 1915 they were very busy, doing apparently at that they possibly could do; but 1917 called upon them even more than 1916, so that in 1917 they did more business in the United States on American railroads than ever before in their history. The New York Central Railroad, with which I am most familiar, did 50 per cent, more business in 1917 than it did in 1914.

"Speaking of the New York Central Railroad in particular, I remember in 1913, in the rate case at that time, I pointed out \$150,000,000 had been invested in the property in the period just previous to that, and we earned \$49.-000,000 more gross, and at the end of that time, after putting \$150,000,000 more gross, we had \$4,000,000 less than we had the year before.

"Now, it doesn't take a financier, nor

does it take any one to measure that seat of the abscess that had been sub-you can't go on that way. So you and sected to operation and Dr. Martin had we, speaking of railroads now and rail-road men and railroad undertakings, re-

we, speaking of railroads now and railroad men and railroad men and railroad undertakings, refer to nothing more than a combination of people who put their money into them to furnish transportation. You have got to take more interest in them; you have got to know not only about railroads but also about other things that are related to you in the business life of our great country here, if we are going to be successful, because if one fant successful the other can't be successful.

'That is what I want to ask you to do; whatever your relation to business is, you have got to get out of the selfah notion you are inside your own shop or your own walls or your own shop or your own walls or your own have to study this thing entirely and wholly. The American railroads are giving to you and have given to you the chapest transportation in all the world, on a given wage. To-day we haul a ton of freight five miles for a three cent postage stamp. Just figure out what it costs you to haul a ton somewhere on a motor truck."

Miss Stricker tell the Vigilantes that Co. Rocsevelt could not leave the Hotel Langdon that evening. Mrs. Derby, who with her children had been vith her children had been with her children had been band at the weak at the tangent with her children had been with her children had been band. Dr. Richard Derby, entered the Langdon that evening her children had been with the Langdon that evening here. Longworth and merely come of \$10,00 and \$5,000 per annum thereafter. For the same service, where at the Langdon. Mrs. Longworth had merely come to wait at this time. She was not summoned because of her hamped to prove the cheaped transportation to ask you on the business life to you of the serv

the last ten years, since 1907, we be lieve we were right, we stood with tears in our eyes, practically, pleading for enough consideration to give the facilities needed by you and all the rest. What you need more than anything else is transportation. Now we are in the midst of war, and we all have to have patience, because these are critical times. We have got to the crucial point of things, and we have got to realize we are at war, and war is a terrible thing, and it requires sacrifice."

At this point Mr. Smith offered a strong defence for railroad men, saying they are working having the they are working having the two that the Colonel is not necessarily going to be deaf because the

strong defence for railroad men, maying they are working harder than they ever worked before. He described the hardships of labor under such weather handicaps as the roads have suffered. He continued:

"Short Stoppages" Intimated. Mr. Smith was asked if he anticipated

Mr. Smith was asked if he anticipated an embargo against freight moving westward from New York. He said he did not, though there might be "short stoppages." Another questioner wanted to know if there are to be "passengerless days." The regional director replied: "Well, I should say not."
He referred to the Garfield industrial suspensions, saying: "A few days ago we stopped everything for five days. What was the situation? We were at war, and we declared to our allies we would give them food and ships; would give them many things. We said: 'You can depend upon us.' Then sent ships, trustingly sent ships, and they stood down here twenty or thirty days waiting for coal. Now, what would you have done? What matters it if you do not do some things when other things are more essential and necessary." You have to leave it to those men who have been selected to those men who have been selected to

judge—it might be that other men may be better judges, other men might know better if they can only find them—is the first thing to do for they are doing it not for themselves."

The regional director spoke at noon, having to leave at 1 P. M. to go to GROUND AT ALBANY

GROUND AT ALBANY

IS LAID TO WOMAN

SIR GEORGE SMITH COMING. Will Help Quicken America's Arder in War Work.

A cablegram from Ambassador Page in London yesterday notified the National Committee on the Churches and the Moral Aims of the War that Sir George Adam Smith, one of the foremost churchmen in Great Britain, has accepted the committee's invitation, sent through Mr. Page, to make a speaking tour of the United States.

The Rev. George Adam Smith is known throughout the world as an authority on Biblical criticism and church history. He has lectured in this country at the universities of Yale, Johns Hopkins, California and Chicago. He is principal and vice-chancellor of Aberdeen University, Scotland, and is chairman of the Scottish Council of Women's Trades.

He will be one of the most distinwivid picture of the struggles and stresses of railroad operation in these times of extraordinary traffic and extreme cold weather.

Mr. Smith, who is president of the New Tork Central and a railroader with forty years experience, made it plain the present difficulties of the roads were due in part to the past indifference of the correct and a league of nature of the struggles and the significant process. He will be one of the most distinguished members of the corps of speak-trailed to send through the country addressing gatherings of clergymen and prominent layers and recognition of its fundamental sims—the defeat of autocracy and militarism, a permanent peace and a league of nature of the corps of speak-trailed through the country addressing gatherings of clergymen and prominent control to the committee. It is to quicken the spirit of America for a vig-

HYLAN HELL GATE PLEA TO WILSON

Mayor Will Urge President to Back Plan for 40 Foot Channel.

IMPERATIVE WAR NEED

Hulbert Says Army Engineer Board Keeps 16 Piers Unavailable by Sloth.

Mayor Hylan is planning to drop in on President Wilson in Washington February 15, en route South, to urge upon the President the need of a forty foot channel through Hell Gate and for a channel of similar depth the length of the East River. The Mayor's support to this project has been enlisted by Murray Hulbert, Commissioner of Docks, who yesterday invited members of the Chamber of Commerce to go along and impress upon Washington officials the need of this improvement for New York's

harbor.
The new Commissioner of Docks spoke at noon yesterday to members of the Chamber of Commerce and outlined to them the fight for deep water which has been made for this port. In reviewing the project he blamed the board of army engineers which passes on all improvements proposed by the river and harbor bill for a misconstruction of the terms of the bill, as passed August 8, 1917, with regard to the depth of the work to be attempted been

He said that the Secretaries of War and of the Navy approved of and have urged the forty foot depth for Hell Gate, but that the board of engineers takes the position that thirty-five feet is sufficient for "commercial pur poses" and that the forty foot depth can be secured later. Mr. Hulbert declares himself decidedly dissatisfied and is conducting a strenuous campaign to have the forty foot project commenced and completed within the near future. He declared that the strategic valu

He declared that the strategic value during war time of a forty foot channel through Hell Gate to Long Island Sound is worth far more to the country than the money it will cost.

"Here is one instance," said the speaker. "Last fail the battleship Texas went ashore on Block Island and stove a hole in her bows. She drew thirty-one feet of water when she went ashore and thirty-six feet after the water had set-tled in her hold. If we had had a forty foot channel through Hell Gate sh could have been brought safely and se curely through the inland way to dr dock. Instead she had to await favor able weather to be convoyed around the outside route. Had there been an enemy submarine in the vicinity she would have been helplessly crippled. The battleship
